Group Admininstrator can invite members

Daycos - 2026-08-28 - Billing / Receipt

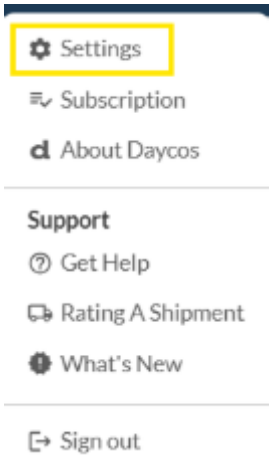

Creating a GROUP Membership:
To consolidate the $10 monthly charge into one group charge on a credit card, a Premier member of your team can go to their **Profile** in the upper right corner - Choose **Settings** - **Company Administration** - **Company Information** (➡Complete this section)
Then proceed to **Setting > Invitations**

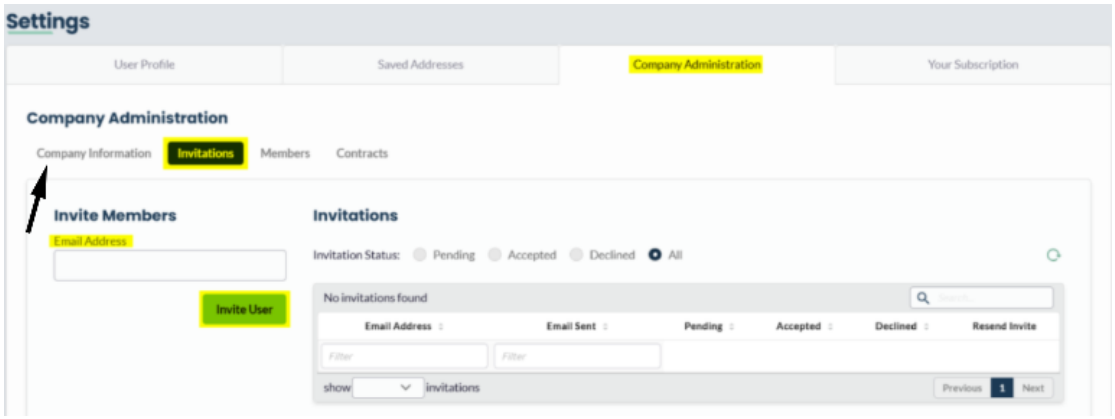

Invite Members by entering their email address - **Invite User**

The user will receive an email and will need to **Accept the Invite**

If they have a free/standard login, they will then join the Premier status, and the credit card on file with the Group Owner will now be charged an additional $10 for the new login.

If you invite three users, along with the Group Owner, that card on file will have a $40 monthly charge vs having four separate charges for each Premier login.
