How does MoversPay handle minimum weights?

Anita L - 2021-06-24 - Rating a Shipment

We understand sometimes it gets confusing and hard to remember what the weight minimums are for all of the tariffs. Good news! MoversPay automatically applies the minimum weights where applicable so you don't have to worry about it! You just enter the weight of the shipment, and our program will take care of the rest and apply minimum weight if it is not met per that tariff guideline.

How can you see this happening for yourself? Click the line item for additional rating details. In this example, the shipment weight was entered at 350, but in the line details you can see the 1000 pound weight minimum is being applied.
