What is TSPLink?

Anita L - 2021-06-25 - TSPLink

TSPLink is the platform of MoversPay that allows you to apply a compensation schedule to the tariff rating, all in the same tool. No more bouncing around between multiple systems to rate the shipment and then create the invoice. TSPLink is available for your use with a Premier subscription.

With TSPLink, we've installed a GBL reader to retrieve data from an uploaded document to auto-populate shipment information into the fields, further reducing manual inputs to get you your invoice.
